INSIGHT HISTORICAL REPLAY SEED | 11 OCT 2026

Aave wstETH CAPO: a two-block replay seed

Explorer cross-check completed 11 Oct 2026 | Ethereum mainnet | one parameter update linked to one liquidation example

CAPO UPDATE	REPLAYED CAP	LIQUIDATION EXAMPLE
24626860	**1.1939468361**	**10.0031532784**
2026-03-10 11:46:11 UTC Exact tx hash and event log match	wstETH/stETH exchange ratio Integer replay from event parameters	wstETH seized	block 24626861 12 seconds after update

Verified on-chain records

BLOCK / TIME	RECORD	EXPLORER-CHECKED VALUES
24626860 10 Mar 2026 11:46:11 UTC	CAPO *CapParametersUpdated* 0x32c64151...dfe5a1e	Snapshot ratio 1.191926196478762900; snapshot timestamp 2026-03-03 11:00:47 UTC; growth 3,326,024,394 / second; annual growth 880 bps.
24626861 10 Mar 2026 11:46:23 UTC	Aave V3 *LiquidationCall* 0x7872defd...995812f5f	10.003153278366877706 wstETH collateral; 11.836703277700000242 WETH debt. Exact amounts match the decoded event.

CAPO arithmetic replay

MAX-RATIO FORMULA	ELAPSED	INTERNAL GROWTH / SECOND	REPLAYED CAP
snapshotRatio + scaledGrowth x elapsed / 1,000,000	607,524 sec	3,326,024,394,030,033	**1.193946836122721601**

Aave reports an approximately **2.855%** effective exchange-rate decrease, about 10,938 wstETH liquidated across 34 accounts, and no protocol bad debt. The replayed cap is consistent with its approximate 1.1939 figure. The ratios above are wstETH/stETH, not USD prices.

Commercial read

Insight alone: test demand for a fixed-scope oracle replay and reusable evidence. **PriorSeal alone:** this historical execution has no pre-execution PriorSeal authorization. **Integrated offer:** binding a future Insight assessment digest to an exact proposed call remains a hypothesis to validate.

Evidence boundary

Etherscan transaction hashes, block numbers, timestamps, and decoded event values were cross-checked. Raw RPC receipts, historical *eth_call* values, complete liquidation-range scanning, and deployed-bytecode matching are still pending. This is a bounded two-transaction seed, not a sale-grade incident reconstruction.
